For Isaac Ryan
& C. Ward

"I can calculate the motion of heavenly bodies,
but not the madness of people."

Isaac Newton

Contents

1. Equal relationships are indivisible by three. 13
2. When points belong to something at a fixed time, it is a date. 14
3. The marriage bed is a sacred surface. 15
4. Did the imagination conceive Time? 16
5. Bodies in geometric space are subject to linear time. . . . 18
6. Memory is a line that repeats upon itself. 19
7. To formulate the proposition. 21
8. Theorem: Economic rationalism and philosophy are incongruent. 23
9. An acute conversation: speakers are < 90˚apart. 25
10. Memory is a line that intersects with itself. 27
11. Like formulae, can love be re-arranged? 28
12. To propose the formula 29
13. Indifference: two circles that touch but do not cut one another. 30
14. To go beyond the proposition. 31
15. Acute memories can permeate 90% of one's life. 32
16. Definition: Bases are those who support a top. 34
17. An idea is that which has depth and a vast length and breadth expandable over the distance of time. 35
18. Let ballet be a mathematical catalyst. 36
19. Definition: Body chronology can be unequal to the mind's. 37

20. Parallel planes in unparalleled spaces are those which can meet. 38
21. The reconciliation of parallel lines, like opposing concepts, cannot occur. 40
22. When uneven planes collide, the weaker will no doubt be crushed. 41
23. Two points may exist in the same space but not necessarily in the same plane. 42
24. If there is no action a consequence can still occur. 43
25. The line of compassion can filter through a phone call. 44
26. The face of a solid is a surface, but a surface is not necessarily solid. 45
27. The line of compassion cannot filter through a phone call. 47
28. Water abstracts the straight line. 49
29. Let Mathematics be the bridge to the Arts. 51
30. Postulate1: To calculate lust. 52
31. Theorem: Love and sex coincide with one another but are not equal. 53
32. The past is that which has length and lingers. 55
33. Death's axis can be difficult to cross. 56
34. Love's only axiom is uncertainty. 57
35. L (∈) = K $\in^{1\text{-}D}$ 58
36. For every triangle there is a sin. 59
37. The axiom of decision can only be made in fixed space and time. 61
38. New angles change perspective. 63
39. And deception is the centre of silence. 65

Poetics of a Mathematician I–XIV 67

40. The action cannot be undone. 81
41. The diameter of decision can encompass a whole life. 82
42. Once bisected a life cannot be reconnected. 83
43. Proposition: Ratios of difference may sometimes be equal. 85
44. If the interval is prolonged indefinitely, the given points may never meet. 87
45. Postulate: Death is disclosed. 88
46. Equal circles are those who interests are parallel and unconflicting. 90
47. A plane angle is the inclination of two lines in a plane which meet one another, do not lie in a straight line, but lie in sympathy. 91
48. The discourse of mathematics and medicine may conflict. 93
49. The final postulate cannot be proven. 94
50. A life is a line with eternal breadth. 95

About the author 97

1. Equal relationships are indivisible by three.

"You came to the wrong conference, René."
"Yes, Doctor Dempewolf."
"Please, Diego. Drink?"

René refused, already intoxicated by Diego's triangular figure.
"What are you studying?" Diego asked, noticing a diary
beside René.
"A doctorate in analytic geometry; my supervisor's
passionately *ruthless*!"

Diego finished off his drink and saddened.
"Sounds like my marriage but with less of the passion."
Marriage is a multiple of two and René realised he was

a remainder. Piece by piece did Diego analyse the slender
body.
"Do you know what 'synthetic a priori' is?" René shook his
head.
Diego explained, but his first intuition was to close the
bedroom door.
